| <b>FOREWORD</b>   | <b>xi</b>   |
| <b>ORGANIZING COMMITTEE AND LIST OF REFEREES</b>  | <b>xiii</b> |
| <b>SPONSORS OF THE CONFERENCE</b>   | <b>xv</b>   |
| <b>KEYNOTE PAPERS</b>   |             |
| <b>On the contribution of hydrogeology to advances in geostatistics</b><br>CHILÈS J.-P.   | <b>1</b>    |
| <b>Advances in modeling and inference for environmental processes with nonstationary spatial covariance</b><br>SAMPSON P. D., DAMIAN D. AND GUTTORP P.  | <b>17</b>   |
| <b>AIR POLLUTION / CLIMATE</b>  |             |
| <b>Ordinary and indicator kriging of monthly mean nitrogen dioxide concentrations in the United Kingdom</b><br>ATKINSON P. M. AND LLOYD C.D.  | <b>33</b>   |
| <b>Total air pollution and space-time modelling</b><br>DE IACO S., MYERS D. E. AND POSA D.  | <b>45</b>   |
| <b>Geostatistical interpolation of rainfall in mountainous areas</b><br>DERAISME J., HUMBERT J., DROGUE G. AND FRESLON N.   | <b>57</b>   |
| <b>Incorporating information from a digital elevation model for improving the areal estimation of rainfall</b><br>GÓMEZ-HERNÁNDEZ J. J., CASSIRAGA E. F., GUARDIOLA ALBERT C.<br>AND ÁLVAREZ RODRÍGUEZ J. | <b>67</b>   |
| <b>Robust predictions of rainfall in Navarre, Spain</b><br>MILITINO A. F., PALACIOS M. B. AND UGARTE M.D.   | <b>79</b>   |

**Powering an Egyptian air quality information system with the Bayesian Maximum Entropy space/time analysis toolbox: results from the Cairo baseline year study.** 91

SERRE M., CHRISTAKOS G., HOWES J. AND ABDEL-REHIEM A. G.

## ENVIRONMENT

**Space-time modeling of sand beach data: a geostatistical approach** 101

BOURGINE B., CHILÈS J.-P. AND WATREMEZ P.

**Identification of regional variability component by geostatistical analysis of stream sediments** 113

BRUNO R., PALUMBO V. AND BONDUA S.

**Delineation of hazardous areas and additional sampling strategy in presence of a location-specific threshold** 125

GOVAERTS P. AND VAN MEIRVENNE M.

**Local interpolation of some chemical parameters after the removal of the Aznalcóllar mine spill sludge (south-east Spain)** 137

VANDERLINDEN K., GIRÁLDEZ J. V., ORDÓÑEZ R. AND VAN MEIRVENNE M.

**Geostatistical evaluation of a monitoring strategy for water quality assessment** 149

VENARD C., AULINGER A., LAJAUNIE C. AND WACKERNAGEL H.

**Application of data assimilation to three-dimensional hydrodynamics: the case of Odra lagoon** 157

WOLF T., SÉNÉGAS J., BERTINO L. AND WACKERNAGEL H.

## HEALTH / ECOLOGY

**Geostatistical characterization of a pine tree productivity index** 169

ALMEIDA J. AND SANTOS C.

**Impact of local pollution on fish abundance using geostatistical simulations** 181

DE OLIVEIRA E., BEZ N. AND PREVOST E.

**An application of geostatistical and GIS techniques to indoor radon risk mapping** 193

ZHU H.C.

## HYDROLOGY

**Stochastic flow and transport simulations of a three-dimensional tracer test in moderately fractured plutonic rock.** 205

CHAN T., STANCHELL F. W. , SRIVASTAVA R. M., SCHEIER N. W.  
AND JENSEN M. R.

**A probabilistic and conditional approach for delineating the extent of a contamination plume within an aquifer** 217  
FROIDEVAUX R., GARCIA M. AND BLONDEL T.

**Geostatistical modeling of tracer tests in a single fracture. Calibration of transport parameters** 227

JODAR J., ALCOLEA A., MEDINA SIERRA A. AND CARRERA J.

**Radial flow in a bounded randomly heterogeneous aquifer with recharge** 239

RIVA M. AND TEI C.

**Uncertainty and sensitivity analyses for contaminant transport, models based on conditional indicator simulations** 251

RÖHLIG K.-J. AND PÖLTL B.

**Analysis of radionuclide migration in rock fractures with heterogeneous matrix diffusion** 263

XU S., WÖRMAN A. AND DVERSTORP B.

## METHOD

**Probability field algorithm for multivariate conditional simulation** 275  
CASSIRAGA E. F. AND GÓMEZ-HERNÁNDEZ J. J.

**Analysing positive-valued spatial data: the transformed Gaussian model** 287

CHRISTENSEN O. F., DIGGLE P. J. AND RIBEIRO JR. P. J.

**Kriging for cut-offs and other difficult problems** 299  
CRESSIE N. AND JOHANNESSEN G.

**Detecting regions of abrupt change: wombling procedure and statistical significance** 311

GEYZÉ J.-F., BACRO J.-N. AND ALLARD D.

**Average length of objects defined from binary realizations: effects of discretization and covariance parameters** 323

GUARDIOLA ALBERT C. AND GÓMEZ-HERNÁNDEZ J. J.

**A positive definite estimator of the non stationary covariance of random fields** 333

GUILLOT G., SENOUSSI R. AND MONESTIEZ P.

**Variogram-derived measures of textural image classification** 345

JAKOMULSKA A. AND CLARK K. C.

**Which experimental variogram for the structural inference: a methodological study** 357

JEANNEE N. AND DE FOUQUET C.

**Parameter uncertainty in spatial prediction: checking its importance by cross-validating the Wolfcamp and Rongelap data sets.** 369

PAPRITZ A. AND MOYEEED R. A.

**Direct sequential co-simulation: a new stochastic modelling for environmental applications** 381

SOARES A.

**Change of support for environmental indicators** 393

STEIN A.

**Bayesian conditioning of a random field to point measurements** 405

TODINI E.

## **SOIL SCIENCE / SITE REMEDIATION**

**Factorial Kriging applied to the study of industrial contaminated soils** 417

BATISTA A. C., FERREIRA DA SILVA E. A., SOUSA A. J.

AND CARDOSO FONSECA E.

**Managing heterogeneous sampling data for geostatistical estimations of Benzo(A) pyrene concentrations in a former gas works** 429

DEMOUGEOT-RENARD H. AND DE FOUQUET C.

**Geostatistical modeling of regionalized grain-size distributions using Min/Max autocorrelation factors** 441

DESBARATS A. J.

**Fine scale soil texture estimation using soil maps and profile descriptions** 453

D'OR D. AND BOGAERT P.

**A comparison of geostatistical simulation approaches for estimating the spatial uncertainty of soil texture** 463

DRUCK FUKS S. AND VOLTZ M.

**Accounting for soft information in mapping soil contamination with TPH at an oil storage site** 475

PEREIRA M., ALMEIDA J., COSTA C. AND SOARES A.

**Geostatistical analysis of PCB-contaminated sediment in a commercial dock, Swansea, UK** 487

REED J., CHAPPELL A., FRENCH J. R. AND OLIVER M. A.

## POSTER PRESENTATIONS

|  |            |
|--|------------|
| <b>Comparison of geostatistical algorithms for completing groundwater monitoring well time series using data of a nearby river</b>                           | <b>499</b> |
| BARABÁS N. AND GOOVAERTS P.  |            |
| <b>Data assimilation and geostatistics in ecological modeling</b>  | <b>501</b> |
| BERTINO L., WACKERNAGEL H. AND VON STORCH H.   |            |
| <b>Spatial patterns of soil seed-bank related to some soil properties</b>  | <b>503</b> |
| BOCCHI S., CASTRIGNANÒ A. AND GEROSA G.  |            |
| <b>Geostatistical analysis for characterization of gully topographic features in olive tree areas</b>  | <b>505</b> |
| CARVAJAL F., DELGADO J., CARDENAL J. AND GIRÁLDEZ J.V.   |            |
| <b>Probabilistic assessment of groundwater contamination by nitrate</b>  | <b>507</b> |
| CASTRIGNANÒ A., BRAGATO G. AND LOPEZ N.  |            |
| <b>BME analysis of neural network residual data from the Chernobyl fallout: Bayesian and non-Bayesian approaches</b>   | <b>509</b> |
| CHRISTAKOS G., SERRE M., DEMYANOV V., TIMONIN V., KANEVSKI M., SAVELIEVA E. AND CHERNOV S.   |            |
| <b>Spatial analysis of soil physical properties in a UK upland subcatchment</b>  | <b>511</b> |
| DEEKS L. K., BENGOUGH A. G., LOW D., ZHANG X., YOUNG I. M., CRAWFORD J. W., CHESSELL J. M. AND BILLET M. F.  |            |
| <b>Digital terrain modelling with geostatistics</b>  | <b>513</b> |
| DELGADO J., CARDENAL J., CARACUEL J.E. AND GÓMEZ A.  |            |
| <b>The PLS regression in spatial statistical estimation</b>  | <b>515</b> |
| ELKETTANI Y.   |            |
| <b>Complex geometry of depositional facies within a coastal aquifer system: three-dimensional mapping of confining layers and hydrogeologic implications</b> | <b>517</b> |
| ERSKINE J. AND FISHER A.T.   |            |
| <b>Geostatistical approach for mapping SPT values at Lisbon</b>  | <b>519</b> |
| FERNANDES L., AZEVEDO P. AND PEREIRA M.  |            |
| <b>Use of multivariate indices to characterise hydrogeochemical data. Application to the alluvial aquifer of Alto Guadalentín, SE Spain.</b>                 | <b>521</b> |
| JIMÉNEZ-ESPINOSA R., CERÓN J.-C. AND PULIDO-BOSCH A.   |            |

|  |            |
|--|------------|
| <b>Evaluation of deleterious and toxic elements contents in Cu-Ag ores from Lubin-Glogow district, SW Poland</b>                           | <b>523</b> |
| MUCHA J., NIEĆ M. AND DOLIK M.   |            |
| <b>Spatial prediction of diameter distribution models in forestry</b>  | <b>525</b> |
| NANOS N. AND MONTERO G.  |            |
| <b>Geostatistical analysis of stereoscopic pairs of satellite images</b>   | <b>527</b> |
| SÉNÉGAS J., SCHMITT M. AND NONIN P.  |            |
| <b>GIS-based classification and indicator simulation of groundwater vulnerability characteristics. Case study on Austrian-Czech border</b> | <b>529</b> |
| STIBITZ M.   |            |
| <b>Spatial variability of heavy metals in an agricultural watershed in Galicia, Spain</b>  | <b>531</b> |
| ULLOA GUITIÁN M., VIEIRA S. R., PAZ GONZÁLEZ A.<br>AND APERECIDA DE ABREU C.   |            |
| <b>Effect of soil properties on vegetation diversity in a created hay meadow. A multivariate and spatial approach</b>                      | <b>533</b> |
| VAZ S., TRUEMAN I. C., FULLEN M. A., COHN E. V. J., OLIVER M. A.   |            |
| <b>Spatial analysis of patchy vegetation on semi-arid steppe</b>   | <b>535</b> |
| WEBSTER R. AND MAESTRE F.T.  |            |
| <b>Author index</b>  | <b>539</b> |
