<b>FOREWORD</b>	<b>xi</b>
<b>ORGANIZING COMMITTEE AND LIST OF REFEREES</b>	<b>xiii</b>
<b>SPONSORS OF THE CONFERENCE</b>	<b>xv</b>
<b>KEYNOTE PAPER</b>	
<b>Two statistical methods for improving the analysis of large climatic data sets: General skewed kalman filters and distributions of distributions</b>	<b>1</b>
NAVEAU P., VRAC M., GENTON M.G., CHÉDIN A. AND DIDAY E.	
<b>AIR POLLUTION &amp; SATELLITE IMAGES</b>	
<b>Super-resolution land cover classification using the two-point histogram</b>	<b>15</b>
ATKINSON P.M.	
<b>Non parametric variogram estimator. Application to air pollution data</b>	<b>29</b>
BEL L.	
<b>Improving satellite image forest cover classification with field data using direct sequential co-simulation</b>	<b>41</b>
BIO A.M.F., CARVALHO H., MAIO P. AND ROSARIO L.	
<b>Use of factorial kriging to incorporate meteorological information in estimation of air pollutants</b>	<b>55</b>
CAETANO H., PEREIRA M.J. AND GUIMARÃES C.	
<b>High resolution ozone mapping using instruments on the nimbus 7 satellite and secondary information</b>	<b>67</b>
CHRISTAKOS G., KOLOVOS A., SERRE M.L., ABHISHEK C. AND VUKOVICH F.	

<b>Geostatistical digital image merging</b>	<b>79</b>
DELGADO–GARCÍA J., CHICA–OLMO M. AND ABARCA–HERNÁNDEZ F.	
<b>On the effect of positional uncertainty in field measurements on the atmospheric correction of remotely sensed imagery</b>	<b>91</b>
HAMM N., ATKINSON P.M. AND MILTON E.J.	
<b>Geostatistical space–time simulation model for characterization of air quality</b>	<b>103</b>
NUNES C. AND SOARES A.	
<b>Soft data space/time mapping of coarse particulate matter annual arithmetic average over the U.S.</b>	<b>115</b>
SERRE M.L., CHRISTAKOS G. AND LEE S.J.	
<b>ECOLOGY &amp; ENVIRONMENT</b>	
<b>Characterization of population and recovery of Iberian hare in Portugal through direct sequential co–simulation</b>	<b>127</b>
ALMEIDA J., SANTOS E. AND BIO A.	
<b>Uncertainty management for environmental risk assessment using geostatistical simulations</b>	<b>139</b>
DERAISME J., JAQUET O. AND JEANNEE N.	
<b>A spatial assessment of the average annual water balance in Andalusia</b>	<b>151</b>
VANDERLINDEN K., GIRÁLDEZ J.V. AND VAN MEIRVENNE. M.	
<b>Modeling phytoplankton: covariance and variogram model specification for phytoplankton levels in lake Michigan</b>	<b>163</b>
WELTY L.J. AND STEIN M.L.	
<b>HYDROGEOLOGY</b>	
<b>Geostatistical inverse problem: A modified technique for characterizing heterogeneous fields</b>	<b>175</b>
ALCOLEA A., MEDINA A., CARRERA J. AND JÓDAR J.	
<b>2D particle tracking under radial flow in heterogeneous media conditioned at the well</b>	<b>187</b>
AXNESS C.L., GÓMEZ–HERNÁNDEZ J.J. AND CARRERA J.	
<b>Comparison of geostatistical algorithms for completing groundwater monitoring well timeseries using data of a nearby river</b>	<b>199</b>
BARABAS N. AND GOOVAERTS P.	

<b>A geostatistical model for distribution of facies in highly heterogeneous aquifers</b>	<b>211</b>
GUADAGNINI L., GUADAGNINI A. AND TARTAKOVSKY D.	
<b>Influence of uncertainty of mean transmissivity, transmissivity variogram and boundary conditions on estimation of well capture zones</b>	<b>223</b>
HENDRICKS FRANSSSEN H.J., STAUFFER F. AND KINZELBACH W.	
<b>Evaluation of different measures of flow and transport connectivity of geologic media</b>	<b>235</b>
KNUDBY C. AND CARRERA J.	
<b>Modeling of reactive contaminant transport in hydraulically and hydrogeochemically heterogeneous aquifers using a geostatistical facies approach</b>	<b>247</b>
PTAK T. AND LIEDL R.	
<b>Effect of heterogeneity on aquifer reclamation time</b>	<b>259</b>
RIVA M., SÁNCHEZ-VILA X., DE SIMONI M., GUADAGNINI A. AND WILLMANN M.	
<b>METHODOLOGY</b>	
<b>Spatial prediction of categorical variables: the BME approach</b>	<b>271</b>
BOGAERT P.	
<b>Optimizing sampling for acceptable accuracy levels on remediation volume and cost estimations</b>	<b>283</b>
DEMOUGEOT-RENARD H., DE FOUQUET C. AND FRITSCH M.	
<b>Combining categorical information with the Bayesian maximum entropy approach</b>	<b>295</b>
D'OR D. AND BOGAERT P.	
<b>Sequential updating simulation</b>	<b>307</b>
FROIDEVAUX R.	
<b>Variance-covariance modeling and estimation for multi-resolution spatial models</b>	<b>319</b>
JOHANNESSON G. AND CRESSIE N.	
<b>Geostatistical interpolation and simulation in the presence of barriers</b>	<b>331</b>
KRIVORUCHKO K. AND GRIBOV A.	

<b>A spectral test of nonstationarity for spatial processes</b>	<b>343</b>
MATEU J. AND JUAN P.	
<b>OCEANOGRAPHY</b>	
<b>Optimization of an estuarine monitoring program: selecting the best spatial distribution</b>	<b>355</b>
CAEIRO S., NUNES L., GOOVAERTS P., COSTA H., CUNHA M.C., PAINHO M. AND RIBEIRO L.	
<b>Geostatistical analysis of three dimensional current patterns in coastal oceanography: application to the Gulf of Lions (NW Mediterranean sea)</b>	<b>367</b>
MONESTIEZ P., PETRENKO A., LEREDDE Y. AND ONGARI. B.	
<b>RAINFALL</b>	
<b>Interpolation of rainfall at small scale in a Mediterranean region</b>	<b>379</b>
BEAL D., GUILLOT G., COURAULT D. AND BRUCHOU C.	
<b>Automatic modeling of cross-covariances for rainfall estimation using raingage and radar data</b>	<b>391</b>
CASSIRAGA E.F., GUARDIOLA-ALBERT C. AND GÓMEZ-HERNÁNDEZ J.J.	
<b>Combining raingages and radar precipitation measurements using a Bayesian approach</b>	<b>401</b>
MAZZETTI C. AND TODINI E.	
<b>SOIL</b>	
<b>Spatio-temporal kriging of soil salinity rescaled from bulk soil electrical conductivity</b>	<b>413</b>
DOUAIK A., VAN MEIRVENNE M. AND TOTH T.	
<b>Characterization of environmental hazard maps of metal contamination in Guadiamar river margins</b>	<b>425</b>
FRANCO C., SOARES A. AND DELGADO-GARCÍA J.	
<b>Detecting zones of abrupt change: Application to soil data</b>	<b>437</b>
GABRIEL E., ALLARD D. AND BACRO J.N.	
<b>Optimal Regional Sampling network to analyse environmental pollution by heavy metals using indirect methods. Case study: Galicia (NW of Spain)</b>	<b>449</b>
HERVADA-SALA C. AND JARAUTA-BRAGULAT E.	

<b>Estimating the grades of polluted industrial sites: use of categorical information and comparison with threshold values</b>	<b>461</b>
JEANNEE N. AND DE FOUQUET CH.	
<b>A co-estimation methodology for mapping dioxins measured by biomonitors</b>	<b>473</b>
PEREIRA M.J., SOARES A., BRANQUINHO C., AUGUSTO S. AND CATARINO F.	
<b>Spatial variability of soil properties at hillslope level</b>	<b>485</b>
ULLOA M. AND DAFONTE J.	
<b>POSTER PRESENTATIONS</b>	
<b>The simple but meaningful contribution of geostatistics: three case studies</b>	<b>498</b>
BONDUA S., BRUNO R., GUÊZE R., MOROSETTI M. AND RICCIARDI O.	
<b>Evolution, Neoteny, and Semi-Variogram Model Fitting Search</b>	<b>500</b>
BONDUA S. AND RAMOS V.	
<b>Kriging of hydraulic head field for a confined aquifer</b>	<b>502</b>
BROCHU Y., MARCOTTE D. AND CHAPUIS R.P.	
<b>Bathimetric Morphological Classification using Geostatistical Approach: an application to the Alboran Sea (S of Spain)</b>	<b>504</b>
DELGADO-GARCÍA J., SÁNCHEZ-GÓMEZ M., ROMÁN-ALPISTE M.J. AND GRACIA-MONT E.	
<b>A strategy for groundwater protection from nitrate leaching using spatial and geostatistical analysis</b>	<b>506</b>
EVERS S., FLETCHER S., WARD R., HARRIS B., OLIVER M., LOVETT A., LAKE I. AND HISCOCK K.	
<b>Visualizing Hake Recruitment A Non-Stationary Process</b>	<b>508</b>
JARDIM E.	
<b>Monitoring in two Markov chain Markov field models</b>	<b>510</b>
JARPE E.	
<b>Geostatistical inversion of flow and transport data. Application to the CRR project</b>	<b>512</b>
JODAR J., MEIER P., MEDINA A. AND CARRERA J.	
<b>Statistical Learning Theory for Spatial Data</b>	<b>514</b>
KANEVSKI M., POZDNUKHOV A., MCKENNA S., MURRAY CH. AND MAIGNAN M.	

<b>Geostatistical analysis of trace elements at small catchment in Finisterre (Spain)</b> LOPEZ A. AND PAZ A.	<b>516</b>
<b>Comparison between Kriging, MLP and RBF in a slate mine</b> MATÍAS J.M., VAAMONDE A., TABOADA J. AND GONZÁLEZ-MANTEIGA W.	<b>518</b>
<b>Estimating spatial variability of temperature</b> MIRAS J.M. AND PAZ A.	<b>520</b>
<b>Spatial variability of soil pH and Eh before and after flooding a rice field</b> MORALES L.A. AND PAZ A.	<b>522</b>
<b>Total catch and effort in the Shark Bay King Prawn Fishery</b> MUELLER U.A., BLOOM L.M., KANGAS M.I., CROSS J.M. AND DENHAM A.M.	<b>524</b>
<b>Using geostatistics to assess the area of spatial representativity of air quality monitoring stations</b> PERDRIX E., FOURCHE B. AND PLAISANCE H.	<b>526</b>
<b>Architecture of fault zones in a granitic massif determined from outcrop, cores, 3-D, seismic tomography and geostatistical modeling</b> PEREZ-ESTAÚN A., MARTÍ D., CARBONELL R., JURADO M.J. AND ESCUDER J.	<b>528</b>
<b>Creation of a Digital Elevation Model of the Water Table in a Sandstone Aquifer</b> POSEN P.	<b>530</b>
<b>A geostatistically interpolated Digital Elevation Model of Galicia (Northwest Spain)</b> THONON I. AND PAZ A.	<b>532</b>
<b>The spatial dependence of soil surface microrelief</b> VIDAL E. AND TABOADA M.M.	<b>534</b>
<b>Author index</b>	<b>537</b>
